York Kitchen Design & Renovation Inc.

# Refacing Door Collection

New doors, drawer fronts, panels and fillers
for your existing cabinets.

yorkkitchen.ca • (647) 546-4945 • yorkkitchen.inc@gmail.com

# What is refacing?

Refacing keeps all of your existing cabinet boxes and changes only the doors, drawer fronts, panels and fillers — so your kitchen looks modern and fresh without a full renovation. It is the lowest-price way to a new-looking kitchen.

## How it works

1 We remove your old doors, drawer fronts, panels and fillers.
2 You choose a new door style and colour from this collection.
3 We fit the new doors, matching drawer fronts, panels and fillers to your existing boxes.
4 Your kitchen looks brand new — the boxes stay, everything you see is new.

Matching drawer fronts are available in regular and reduced rails. Panels and fillers are matched to your chosen door style and colour.

The refacing look: new doors, drawer fronts and panels on existing cabinet boxes.

# Thermofoil Doors

MDF doors with a durable thermofoil finish — the widest range of styles and colours. Each style is shown in one colour; every style can be made in any of the colours at the back of this catalog.
